AIVAe Early Adopter Programme (EAP)

Pharmacy First – Sore Throat Module (v1)

PharmBot AI | November 2025

---

1. Overview

The AIVAe Early Adopter Programme (EAP) is a **select pilot cohort of 10 community pharmacies** who will gain early access to AIVAe's *Pharmacy First Sore Throat Workflow Engine (v1)* before wider rollout.

The purpose of the programme is to:

- Validate the structured clinical workflow
- Reduce consultation/documentation time
- Improve PGD compliance and safety
- Reduce variation between pharmacists/locums
- Demonstrate measurable impact for ICBs and commissioners
- Shape the future direction of Pharmacy First digitisation

AIVAe v1 is built on **deterministic clinical logic**, with no AI-driven decision-making. LLM use is restricted to **SOAP note generation and safety-netting narrative** only.

---

2. What Early Adopters Receive

A. Early Access to AIVAe PF v1

- Full workflow for **Sore Throat** (Centor, red flags, PGD eligibility, outcome engine)
- Automatic SOAP note generation
- PDF export for PharmOutcomes documentation
- Override capture for red flags
- Secure login and user management

B. Direct Collaboration With the Founder & Clinical Team

- Weekly 15–20 min check-ins
- Fast turnaround on feedback
- Ability to influence design decisions
- Direct channel to ask questions, request changes, and test new iterations

C. Pilot Support Pack

- Getting Started Guide
- Data collection sheet (optional)

- Governance & safety overview
- DPIA template (if required)
- Pilot SOP addendum (optional)

D. Preferential Pricing

After the pilot, early adopters will receive:

- **Discounted pricing for 12 months**, and
- First access to new PF modules (UTI, sinusitis, ear pain, insect bites, shingles, impetigo)

---

3. What We Ask From Early Adopters

A. Regular Use During the Pilot (6–8 Weeks)

- Aim: **5+ Sore Throat consultations/week**
  (Or as many as your pharmacy receives naturally)

B. Weekly Feedback

- 15–20 minutes by phone or Zoom
- What worked
- What needs improvement
- Any clinical/safety concerns
- What slows you down

C. Allow Us to Collect Anonymous Metrics

Examples:

- Time spent per consultation
- Documentation time
- Outcome type
- Red flag rates
- Pharmacist satisfaction

(No patient-identifiable data is collected by AIVAe.)

D. Optional: Provide a Testimonial or Case Study

This helps us demonstrate impact to:

- NHS England
- ICB pharmacy teams
- Other pharmacies
- Investors

(Note: this is optional and only if you are comfortable.)

---

4. Pilot Timeline

Week 1

- Onboarding call
- Quick training
- First test consultation (dummy or real)

Week 2–3

- Regular use
- Weekly feedback
- Rapid iteration by our team

Week 4–6

- Continued use
- Feature refinements
- Outcome and usage data collection

Week 6–8

- End-of-pilot review
- Optional testimonial or case study
- Preferential pricing offered
- Decision on continued use

---

5. Selection Criteria (Who We're Looking For)

We are selecting pharmacies that have:

- Good patient flow
- Active participation in **Pharmacy First**
- Interest in digital innovation
- Willingness to test structured workflows
- Pharmacists happy to give honest feedback
- Some locum usage (preferred)
- Desire to reduce documentation burden

Ideal participants include:

- Independent community pharmacies

- Small chains (1–10 sites)
- DSPs with strong clinical service output
- Pharmacies in PF high-demand areas

---

6. Why Join the Early Adopter Programme?

A. Shape the future of Pharmacy First digitisation

Your feedback directly influences the national direction of AIVAe.

B. Improve your team's workflow immediately

Even v1 will reduce:

- Cognitive load
- Documentation time
- PGD checking
- Red flag verification
- Locum variability

C. Be visibly recognised as innovators

You will be:

- Featured as an Early Access Partner
- Invited to future expansion modules
- Prioritised for national pilots

D. Long-term commercial advantage

You get locked-in preferential pricing for 12 months.

---

7. How to Join

Please contact:

Asif Mukhtar
Founder & CEO (Consultant Pharmacist)
PharmBot AI
info@pharmbotai.com

We will schedule a short 15-minute call to confirm suitability and begin onboarding.

---

8. Final Note

Pharmacy First is placing significant operational and clinical pressure on community pharmacy.

AIVAe aims to support:

- Safety
- Consistency
- Faster delivery
- Reduced documentation burden
- Better PGD compliance
- Scalable service delivery

This Early Adopter Programme is your opportunity to help build and shape the UK's first Pharmacy First workflow engine.
